Delivering expertise, advice and integrated environmental solutions to clients in both the public and private sectors.

At Harris Environmental Consulting we make a point of delivering clearly written reports and site plans. Our cost competitive quotes are delivered 5 to 10 days after engagement and include all necessary consultation with stakeholders such as Council, the RFS and Water NSW. Once approved by you, our team of certified, qualified and experienced specialist environmental scientists, bushfire fire and environmental engineers deliver the work on time and to budget. For over 20 years HEC have been delivering cost effective reports that meet compliance requirements. We continually update our knowledge of your local council requirements to keep your building project on track.
